INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No.

PCT/SE2003/000590

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-30</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-30</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-30</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

The claimed invention relates to a method, system and apparatus adapted for negotiation of quality of service. The suggested negotiation is achieved by way of establishing a negotiation process between a mobile station, a packet node and a base station system.

Documents cited in the International Search Report:

D1: US 6374112 B1
D2: WO 0078080 A1
D3: WO 0111910 A1
D4: WO 9905828 A1

In the international search report D1 and D2 was considered to be relevant prior art, which disclosed the claimed invention. None of the cited documents do, however, deal with the problem that the Base Station System is unaware of the mobile station's capabilities during the ongoing quality of service negotiation. The cited documents therefore only represent the general state of the art. The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method, system or apparatus for negotiating quality of service. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-30 is novel and is considered to involve an inventive step. The invention is industrially applicable.
